Istanbul, Turkey | Military Service: Completed

SUMMARY

Senior Frontend Engineer with over 8 years of experience in the React and Next.js ecosystem, dedicated to building sustainable products for both users and developers. Specialized in developing AI-native rule sets to enhance DX standards and engineering productivity. Focused on optimizing performance in large-scale frontend projects, providing technical leadership, and developing software tools that drive operational efficiency.

TECHNICAL EXPERTISE

Frontend Development: React, Next.js, TypeScript, JavaScript (ES6+), TanStack (Start, Query, Router)

State & Form Management: Zustand, Zod, React Hook Form

Styling & UI: Tailwind CSS, shadcn/ui, Framer Motion, Storybook, CSS3/SASS, HTML5

Tools & Data: Git, Cursor (AI-Native Development), Figma, GraphQL

Languages: Turkish (Native), English (Technical reading and writing)

EXPERIENCE

Frontend Team Lead

Aug 2025 – Nov 2025

Machinarium

Remote

- Boosted developer productivity and code consistency by establishing AI-driven rules and standardized coding practices.
- Provided technical guidance to a frontend team of 10, ensuring high engineering standards for complex product launches.
- Resolved technical inconsistencies across the e-commerce ecosystem (PIM, CMS, OMS) by architecting shared components and modular structures.

Senior Frontend Developer

Mar 2024 – Jun 2025

Alışgidiş

Remote

- Architected the scalable foundation of alisgidis.com and elevated team engineering standards through technical sessions and mentorship.
- Improved site speed and SEO efficiency by achieving Lighthouse scores of 90+ through Core Web Vitals optimizations.
- Increased frontend development speed by 25% by designing a modular UI library with Atomic Design principles and dark/light mode support.

Senior Frontend Developer

Jan 2022 – Feb 2024

Gordion

Remote

- Minimized technical debt by integrating modern engineering practices and high-quality code standards into the team culture.
- Ensured technical consistency and accelerated development cycles by building a corporate UI Kit and design systems.
- Developed scalable frontend architectures for comprehensive booking platforms and optimized data management via GraphQL integration.

Frontend Developer

Sep 2020 – Jan 2022

HangiKredi

On-site

- Managed performance improvements and end-to-end development of the hangikredi.com platform; strengthened team standards with high-performance interfaces.
- Accelerated product development by translating complex Figma designs into code with high precision and pixel-perfect accuracy.

Frontend Instructor

Dec 2020 – Feb 2021

Kodluyoruz

Remote

- Delivered comprehensive Frontend 101 training to 30 students, covering HTML, CSS, SASS, JavaScript, Git, and React.
- Enhanced students' modern interface development skills through PSD-to-CSS practices and technical mentorship.

Frontend Developer

Jun 2019 – Nov 2019

Akinon

On-site

- Designed modular component architectures for large-scale e-commerce brands such as Vakko and A101; implemented Zeplin designs with high fidelity.
- Facilitated knowledge transfer and sustainable development by producing detailed technical documentation.

Frontend Developer

Jul 2018 – Nov 2018

Turkcell

On-site

- Resolved critical frontend bottlenecks in real-time, eliminating development cycle blockers.
- Optimized live system bugs instantly, increasing system stability and feedback speed between teams.

Frontend Developer

Jul 2017 – Jun 2018

Ziraat Teknoloji

On-site

- Implemented a comprehensive management panel for construction project budgeting and scheduling in accordance with technical standards.
- Led end-to-end development of Kendo UI-based corporate admin panels and modernized user experience through responsive design.

EDUCATION**Software Engineering (English)**

2012 – 2017

Istanbul Aydın University

Istanbul, Turkey

PROJECTS AND OPEN SOURCE**ViraStack AI** | github.com/virastack/ai-rules

2026

- AI-driven architecture kit and high-discipline protocols for modern React applications.

Input Mask | github.com/virastack/input-mask

2025

- Lightweight, dependency-free input masking library optimized for React Hook Form.

Password Toggle | github.com/virastack/password-toggle

2025

- Fully accessible and highly customizable password visibility hooks for React.

Next.js Boilerplate | github.com/virastack/nextjs-boilerplate

2024

- Production-ready Next.js 16+ starter template built with Tailwind CSS 4 and TypeScript.

Rûznâme | github.com/omergulcicek/ruzname

2025

- Free, open-source calendar interfaces and content platform for calendar subscriptions.

Türkçe Doküman | github.com/omergulcicek/turkcedokuman.com

2023

- Open-source project providing high-quality Turkish resources and content for software development.

Turkuaz | github.com/omergulcicek/turkuaz

2021

- CSS-focused library and methodology for rapid development of minimalist web pages.

INTERESTS

Beyond the technical world; I write **articles** on my personal blog covering technical topics and personal experiences. I am an active **chess** player, and I enjoy hiking and **photography**. I stay active through **football**, **table tennis**, **cycling**, and **swimming**. I enjoy reading **books** on History (Ottoman-Roman), **religious sources**, and personal development.
